Material Safety Data Sheet
Tri-n-butyl phosphate

Section 1 - Chemical Product and Company Identification

MSDS Name: Tri-n-butyl phosphate
Catalog Numbers: AC169930000, AC169930010, AC169930025, AC169930050, AC169932500, AC220240000, AC220240010, AC220240050, AC220242500, B404-4, B404-500
Synonyms: TBP; Phosphoric acid, tributyl ester; n-Butyl phosphate; Tributyl phosphate.

Company Identification:
Fisher Scientific
1 Reagent Lane
Fair Lawn, NJ 07410
For information, call: 201-796-7100
Emergency Number: 201-796-7100
For CHEMTREC assistance, call: 800-424-9300
For International CHEMTREC assistance, call: 703-527-3887

Section 3 - Hazards Identification

EMERGENCY OVERVIEW

Appearance: clear colorless to pale yellow liquid.
Warning! Causes eye and skin irritation. Inhalation of a mist of this material may cause irritation of the lungs. May be harmful if swallowed. Cholinergic (interferes with nerve impulse transmission). Weak cholinesterase inhibitor. Initial symptoms of cholinesterase inhibition may include salivation, sweating, headache, nausea, muscle twitching, tremors, incoordination, blurred vision, tears, abdominal cramps, diarrhea, & chest discomfort.
Target Organs: Respiratory system, eyes, nervous system, skin.

Potential Health Effects

Eye: Causes eye irritation.
Skin: Causes skin irritation. A single prolonged skin exposure is not likely to result in the material being absorbed in harmful amounts. Tributyl phosphate was non-sensitizing after dermal application in guinea pigs.
Ingestion: May be harmful if swallowed.
Inhalation: Inhalation of a mist of this material may cause respiratory tract irritation. Material has a very low vapor pressure at room temperature, so inhalation exposures are not expected unless material is heated or misted. Workers exposed at 15 mg/m3 of TBP have complained of nausea and headache.
Chronic: Prolonged or repeated skin contact may cause dermatitis. Repeated oral administration of TBP has caused pathological changes in the rat bladder.

Section 4 - First Aid Measures
**Eyes:** In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical aid.

**Skin:** In case of contact, flush skin with plenty of water. Remove contaminated clothing and shoes. Get medical aid if irritation develops and persists. Wash clothing before reuse.

**Ingestion:** If swallowed, do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical aid.

**Inhalation:** If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical aid.

**Notes to Physician:** Treat symptomatically and supportively.

---

**Section 5 - Fire Fighting Measures**

**General Information:** As in any fire, wear a self-contained breathing apparatus in pressure-demand, MSHA/NIOSH (approved or equivalent), and full protective gear. During a fire, irritating and highly toxic gases may be generated by thermal decomposition or combustion. Use water spray to keep fire-exposed containers cool. Containers may explode in the heat of a fire.  

**Extinguishing Media:** Use water spray, dry chemical, carbon dioxide, or appropriate foam.

**Flash Point:** 146-165 deg C

**Autoignition Temperature:** > 482 deg C (> 899.60 deg F)

**Explosion Limits, Lower:** None found.

**Upper:** None found.

**NFPA Rating:** (estimated) Health: 2; Flammability: 1; Instability: 0

---

**Section 6 - Accidental Release Measures**

**General Information:** Use proper personal protective equipment as indicated in Section 8.  

**Spills/Leaks:** Absorb spill with inert material (e.g. vermiculite, sand or earth), then place in suitable container. Avoid runoff into storm sewers and ditches which lead to waterways. Provide ventilation.

---

**Section 7 - Handling and Storage**

**Handling:** Wash thoroughly after handling. Remove contaminated clothing and wash before reuse. Use with adequate ventilation. Avoid breathing vapors from heated material. Avoid contact with eyes, skin, and clothing. Avoid breathing spray or mist. Temperatures from 80-100°F (27-37.8°C) provide good rates of flow.

**Storage:** Store in a cool, dry place. Keep from contact with oxidizing materials. Keep containers tightly closed.

---

**Section 8 - Exposure Controls, Personal Protection**

**Engineering Controls:** Facilities storing or utilizing this material should be equipped with an eyewash facility and a safety shower. Use adequate general or local exhaust ventilation to keep airborne concentrations below the permissible exposure limits.

**Exposure Limits**

1/24/2011
OSHA Vacated PELs: Tributyl phosphate: 0.2 ppm TWA; 2.5 mg/m3 TWA

Personal Protective Equipment

Eyes: Wear chemical splash goggles.
Skin: Wear appropriate protective gloves to prevent skin exposure.
Clothing: Wear appropriate protective clothing to prevent skin exposure.
Respirators: A respiratory protection program that meets OSHA's 29 CFR 1910.134 and ANSI Z88.2 requirements or European Standard EN 149 must be followed whenever workplace conditions warrant respirator use.

Section 9 - Physical and Chemical Properties

Physical State: Liquid
Appearance: clear colorless to pale yellow
Odor: odorless
pH: Not available.
Vapor Pressure: 0.00012 mm Hg @ 25 deg C.
Vapor Density: 9.12 (air=1)
Evaporation Rate: Negligible.
Viscosity: 3.39 cps @ 25 deg C
Boiling Point: 289 deg C
Freezing/Melting Point: < -80 deg C
Decomposition Temperature: 289 deg C
Solubility: Slightly soluble in water.
Specific Gravity/Density: 0.9790
Molecular Formula: C12H27O4P
Molecular Weight: 266.32

Section 10 - Stability and Reactivity

Chemical Stability: Stable under normal temperatures and pressures. Decomposes when heated forming phosphoric acid and butene, or on contact with warm water forming phosphoric acid and butanol.
Conditions to Avoid: Moisture, excess heat.
Incompatibilities with Other Materials: Strong oxidizing agents, alkalis.
Hazardous Decomposition Products: Carbon monoxide, oxides of phosphorus, carbon dioxide, n-butanol, phosphoric acid.
Hazardous Polymerization: Will not occur.

Section 11 - Toxicological Information

RTECS#: 
CAS# 126-73-8: TC7700000
LD50/LC50:
CAS# 126-73-8:
Draize test, rabbit, eye: 500 mg Severe;
Inhalation, mouse: LC50 = 1300 mg/m3;
Inhalation, rat: LC50 = 28 gm/m3/1H;
Oral, mouse: LD50 = 1189 mg/kg;
Oral, rat: LD50 = 3 gm/kg;
Skin, rabbit: LD50 = >3100 mg/kg;
Carcinogenicity:
CAS# 126-73-8: Not listed by ACGIH, IARC, NTP, or CA Prop 65.

Epidemiology: No information available.
Teratogenicity: No information available.
Reproductive Effects: No information available.
Mutagenicity: No information available.
Neurotoxicity: No information available.
Other Studies:

Section 12 - Ecological Information

Ecotoxicity: Fish: Rainbow trout: LC50 = 5.0-9.0 mg/L; 96 Hr.; Unspecified
Fish: Carp: LC50 = 5.0-9.0 mg/L; 96 Hr.; Unspecified No data available.
Environmental: TERRESTRIAL FATE: If applied to soil, tributyl phosphate would be expected to
adsorb to soil and biodegrade. Tributyl phosphate applied to land as sludge, tilled and irrigated
with wastewater was completely degraded. AQUATIC FATE: If released in water, tributyl
phosphate will adsorb to sediment and particulate matter in the water column and biodegrade.
In a study of contamination of the lower Weser River, Germany it was found that in the high
water periods in the cold months (flow rate >400 cu m/s, avg temp 6.9 deg C).
Physical: ATMOSPHERIC FATE: In the atmosphere, tributyl phosphate should exist primarily as
a vapor, based upon the vapor pressure of 1.2X10^-4 mm Hg at 25 deg C and degrade due to
reaction with photochemically-produced hydroxyl radicals. Its estimated half-life with hydroxyl
radical is 4.9 hr. Tributyl phosphate partitions into fog water in the atmosphere to an extent
which is ten times greater than that predicted from the Henry’s Law constant. The aqueous-
phase enrichment is 1.6 million as determined from the concns in fog water and interstitial air.
Other: According to a suggested classification scheme, this estimated Koc suggests that tributyl
phosphate would have low mobility in soil. The partition coefficient between marine sediment
and water is 3.5.

Section 13 - Disposal Considerations

Chemical waste generators must determine whether a discarded chemical is classified as a
hazardous waste. US EPA guidelines for the classification determination are listed in 40 CFR Parts
261.3. Additionally, waste generators must consult state and local hazardous waste regulations
to ensure complete and accurate classification.
RCRA P-Series: None listed.
RCRA U-Series: None listed.

Section 15 - Regulatory Information

US FEDERAL

http://fscimage.fishersci.com/msds/01643.htm
1/24/2011
TSCA
   CAS# 126-73-8 is listed on the TSCA inventory.

Health & Safety Reporting List
   CAS# 126-73-8: Effective 6/18/86, Sunset 6/18/96

Chemical Test Rules
   CAS# 126-73-8: 40 CFR 799.4360

Section 12b
   None of the chemicals are listed under TSCA Section 12b.

TSCA Significant New Use Rule
   None of the chemicals in this material have a SNUR under TSCA.

CERCLA Hazardous Substances and corresponding RQs
   None of the chemicals in this material have an RQ.

SARA Section 302 Extremely Hazardous Substances
   None of the chemicals in this product have a TPQ.

SARA Codes
   CAS # 126-73-8: immediate, delayed.

Section 313
   No chemicals are reportable under Section 313.

Clean Air Act:
   This material does not contain any hazardous air pollutants.
   This material does not contain any Class 1 Ozone depletors.
   This material does not contain any Class 2 Ozone depletors.

Clean Water Act:
   None of the chemicals in this product are listed as Hazardous Substances under the CWA.
   None of the chemicals in this product are listed as Priority Pollutants under the CWA.
   None of the chemicals in this product are listed as Toxic Pollutants under the CWA.

OSHA:
   None of the chemicals in this product are considered highly hazardous by OSHA.

STATE
   CAS# 126-73-8 can be found on the following state right to know lists: California, New Jersey, Pennsylvania, Minnesota, Massachusetts.

California Prop 65
   California No Significant Risk Level: None of the chemicals in this product are listed.

European/International Regulations

European Labeling in Accordance with EC Directives

Hazard Symbols:
   XN

Risk Phrases:
   R 22 Harmful if swallowed.
   R 38 Irritating to skin.
   R 40 Limited evidence of a carcinogenic effect.

Safety Phrases:
   S 36/37 Wear suitable protective clothing and gloves.
   S 46 If swallowed, seek medical advice immediately and show this container or label.

WGK (Water Danger/Protection)
   CAS# 126-73-8: 2

Canada - DSL/NDSL
   CAS# 126-73-8 is listed on Canada's DSL List.

Canada - WHMIS
   This product has a WHMIS classification of D2B.
   This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations and the MSDS contains all of the information required by those regulations.

Canadian Ingredient Disclosure List
   CAS# 126-73-8 is listed on the Canadian Ingredient Disclosure List.
